

Smaller Faster Smarter *Proven.*TM

Software Engineer (f/m/d)

[Lam Research](#), headquartered in Silicon Valley, California, employs more than 16,000 people worldwide and is a leading supplier of semiconductor manufacturing equipment. Lam's wafer fabrication equipment and services allows chipmakers to build smaller, faster, and better performing electronic devices. It's why nearly every advanced chip today is built with Lam Research technology. In Villach, Lam Research employs more than 700 people for the development and manufacturing of wafer cleaning equipment.

Join our international team and start your career in the semiconductor industry! Development opportunities, a positive working environment, bonuses and much more make us „**A COMPANY WHERE SUCCESSFUL PEOPLE WANT TO WORK**“.

Responsibilities

- Software development in hardware related software
- Lead software/test design efforts, including authoring and reviewing proposals
- Drive root cause analysis in case of customer escalations
- Develop test plans to properly characterize the design and validate if operational performance requirements are met
- Present relevant material in design, and project reviews

Qualifications

- HTL/FH/University degree in software engineering or related technical field
- Experience in programming languages like C or C++
- Very good oral and written communication skills in English
- Technical understanding and good problem-solving skills
- Ability to work independently and focus on detail
- Work experience for more than 2 years in a similar field
- Experience in semiconductor industry is also beneficial
